

Job Announcement

GENERAL PURPOSE:

A mid-level position that is responsible for professional engineering and project management duties related to the design, construction, operation and maintenance of water and wastewater assets. Work is performed independently and under limited supervision with considerable latitude. Position typically requires processing and interpreting more complex, less clearly-defined issues.

EXAMPLES OF DUTIES:

The following example of duties is intended to be representative of the tasks performed within this classification. It is not necessarily descriptive of any one position in the classification. The omission of a duty does not preclude management from assigning duties not listed herein if such duties are a logical assignment to the position.

- Performs and coordinates subdivision reviews.
- Directs the Utility Asset Mapping Program.
- Use CADD software to design in-house projects and assist consulting engineering firm with large scale projects.
- Create detailed drawings for small scale projects and initiate permitting process through regulatory agencies.
- Manage permitting process with state and county – including site surveys and coordination with state and county officials.
- Prepares cost estimates for projects.
- Plans, designs, and manages in-house water and wastewater infrastructure projects.
- Coordinates the meter reading program.
- Assists the General Manager with the overall direction and strategic planning of the water system.
- Assist tech support with computer/network issues.
- Performs other duties as assigned.

CEW&SA seeks an individual who can work effectively with employees across the organization. The ideal candidate is an adaptive problem solver with experience developing and motivating other employees in the pursuit of CEW&SA goals and initiatives. This person will be a skilled communicator and relationship builder who can maintain those working relationships with the public, other departments, regulatory and local partner agencies, and elected officials. This person must be reliable, a self-starter, versatile in performing multiple aspects of the position without constant supervision, and a part of the team. The successful candidate will need strong technical knowledge; a comprehensive understanding of federal, state, and local laws, regulations, codes, and statutes. The individual must adhere to the Engineering Code of Ethics.

MINIMUM QUALIFICATIONS:

BS degree in Civil or Environmental Engineering and progressively responsible experience, including relevant design or construction administration and management experience on water and wastewater facilities and infrastructure. An MS degree in Civil or Environmental Engineering may be applied towards the experience requirements.

State of Alabama driver license required and maintain insurability as determined by CEW&SA's insurance carrier. Certification as an Engineer Intern (EI) with the State of Alabama is desired, but not required. Professional Engineering (PE) license from the State of Alabama is desired, but not required. An MBA, or work toward an MBA, would benefit the applicant in the hiring process. Experience in plan design/review and contract administration is preferred. Experience with SCADA, CADD, GIS, Water Modeling is preferred.

CONDITIONS OF EMPLOYMENT:

Those selected for employment will be required to pass Pre-Employment checks depending on the position requirements. Those could include, but are not limited to: criminal background check, drug screen, education verification, etc. Criminal convictions will be considered on a case-by-case basis. If required, those selected for employment may serve a one-year probationary period. Equal Opportunity Employer.

The work is typically performed in an office and in the field. Field work involves risks or discomforts which require special safety precautions, e.g., working under extreme outdoor weather conditions, working around moving parts, machines, irritant chemicals, walking on uneven ground and around obstacles, etc. May be required to use protective clothing or gear such as masks, coats, goggles, gloves, or shields. Field work requires some physical exertion such as walking, climbing, bending, stooping, stretching, or similar activities.
